

**Coupa Quick  
Reference Guide for  
Suppliers |  
cXML connection  
setup**

## Setup of cXML connection

### Automatic data transfer of order information via cXML

For companies with large transaction volumes and existing EDI connection, we recommend providing the technical prerequisites to establish a cXML connection.

#### Initial Contact and Information Gathering

Please complete the “purchase order transmission” section in the supplier [questionnaire](#).

#### Validation of cXML connection

Validate cXML connection by running agreed test scripts with Schaeffler

#### Validation of cXML connection in production instance

Conduct final End-to-End (E2E) smoke test in Production instance to ensure cXML connection is ready

To start the cXML setup process, please send the supplier questionnaire to your contact at Schaeffler Purchasing.
